Certified Medical Chart Auditor-E/M (CMCA-E/M)

Be among the first to earn PMI's all-new credential!

A CMS report found that 42 percent of Medicare claims for E/M services in 2010 were coded incorrectly. Improper payments for E/M services continue to be a high-risk area in the medical office. CMCA-E/M-certified professionals manage risk, protect practice revenue, and verify claim accuracy/compliance before submission.

The Certified Medical Chart Auditor-E/M curriculum is tailor-made for physician offices. These certified professionals understand the consequences and penalties for improper payments for E/M services, and are well qualified and knowledgeable to protect the office revenue.

Learning Objectives:

- Receive the information and tools needed to fully understand the E/M auditing process
- Learn why auditing is essential to the viability and sustainability of your medical practice
- Learn how to identify areas of risk associated with E/M coding and documentation
- Increase your understanding of documentation requirements for the three key components: history, exam, and medical decision-making.
- Receive a step-by-step review of documentation requirements for '95 vs. '97 guidelines
- Practice E/M auditing skills by participating in hands-on evaluation and management case studies

No additional resources needed for this program. A CPT code set manual is optional but not required for full participation.

Registration Form Keep a copy for your records. List additional registrants on duplicate forms.
