Recommendations:

We encourage you to ask your medical
or dental provider the following questions if a
narcotic pain medication is discussed:

- Are there risks associated with taking
narcotic pain medications?
- How long can
I safely take this
narcotic pain
medication?
- How would
I know if I have
become addicted
to a narcotic pain
medication?
- Are there other options or safer alternative
therapies to better respond to pain?

*Additionally, naloxone is available at all major
pharmacies in Monroe County through a standing
prescription. It is covered by most insurance
plans. A separate prescription from your health
care provider is not needed. With a naloxone
kit and the proper training, together we can work
to prevent overdoses in our community!*
