

- _____ **Are you between the ages of 55 and 80?**
- _____ **Are you a current smoker or former smoker who has quit within the past 15 years?**
- _____ **Do you have a 30+ year smoking history?**

If so, you could be at high risk for lung cancer.

Early detection of lung cancer with annual low-dose computed tomography (LDCT) screening may benefit patients who meet these criteria.

For more information about LDCT, please give this card to your physician during your visit.
