

MCMS and 7th District Branch Physicians -

March 30th, National Doctor's Day, is a day set aside to show appreciation for the role of America's physicians in caring for the sick and advancing the art and science of medicine. I would like to take this opportunity to recognize the physicians in our community who dedicate their lives to the health and well being of their patients.

Since the days of the Hippocratic Oath, the physician has been held in high esteem as healer, trusted confidant and patient advocate. The relationship between physician and patient is invaluable. Technological breakthroughs have done much to advance the science of medicine, however, the patient- physician relationship remains the fundamental tenant of medicine. Patients depend on their doctors, and for good reason.

I've worked alongside physicians for a number of years, and I continue to be inspired and impressed by the selfless dedication and compassion you show to our community. As you give your all to your patients, I'm proud MCMS stands ready to support you. Please continue to reach out if there is anything we can do for you.

Thank you for choosing to practice medicine. Thank you for all you are. And, as always, thank you for all that you do for this community.

Chris
