Advanced Coding & Auditing Boot Camp

Get answers to your toughest coding and auditing questions

Physician services and improper coding continue to be high profile items on the Office of the Inspector General's audit radar. Improving audit proficiency prior to claims submission reduces practice risk and promotes proper payments. Participants in this session will audit case scenarios, including evaluation and management, ICD-10, and procedural codes with appropriate use of modifiers as they relate to coding and auditing from documentation.

Class Highlights

- Discuss the benefits of establishing an ongoing chart audit process
- Review resources and tools needed to create a successful chart audit process
- Identify key components, code linkage issues, and proper evaluation of the presenting problem
- Step-by-step review of E/M coding procedures and '95 vs. '97 guidelines
- Guidance on selecting the level of medical decision-making
- Complete hands-on coding scenarios designed to help capture proper reimbursement under the current coding requirements
- Review E/M documentation guidelines, as well as surgical and procedural documentation requirements
- Practice with a series of advanced-level auditing exercises that will put your audit skills to the test

To fully participate, participants should bring current year CPT® and ICD-10-CM Code Set manuals to this class. A medical dictionary is recommended, but not required.

Registration Form Keep a copy for your records. List additional registrants on duplicate forms.
